TECHNICAL DATASHEET

■ PRODUCT DATA

Reference: P4 SANDBAG

Description: Pack of four
refillable ballasts

Dimensions: 300x300x240-260 cm

Color: Black

■ TECHNICAL SPECIFICATIONS

MATERIAL	Oxford 600D
UV PROTECTION	UV resistant
WATERPROOFNESS	Water repellent
CAPACITY	15 kg
RECOMMENDED USE	Fastening tents in gardens, terraces, and outdoor areas

■ ASSEMBLY AND USE

The use of the weights consists of filling the bags with materials such as sand, stones, or water bottles up to a capacity of 15 kg per unit. To ensure the stability of the tent on surfaces where pegs cannot be used, simply fix the weights to the structure using the integrated Velcro straps, wrapping them firmly around each leg to guarantee proper attachment to the base. It is very useful for keeping the tent steady in gardens, terraces, and outdoor areas, preventing movement caused by wind. For disassembly, simply release the Velcro straps from the legs and empty the filling material before folding the bags for storage.

■ MAINTENANCE

Periodically check the fabric and Velcro straps to ensure they are in good condition. Cleaning should be done with water and neutral soap, avoiding abrasive products. It is essential to dry the material completely before storing it to prevent mold or moisture. The weights should be stored in their transport bag in a dry, protected place, and should not remain permanently mounted or exposed to adverse weather conditions to guarantee their durability.
