UV PROTECTION	UV30 +
WATERPROOFNESS	High
FIXINGS	Stainless steel D-rings and fixing ropes
ACCESSORIES	Carry bag
RECOMMENDED USE	Gardens, terraces, patios, and outdoor areas

ASSEMBLY OPTIONS

“Resort” effect installation is recommended (image 1). Clearly define the sail’s tilt to assist water drainage, as well as the tension to keep it firm, avoiding excessive strain. It is important to select a location with solid anchor points (walls, posts, or trees) and leave at least an extra 10% of space between anchors relative to the sail’s dimensions. For more information, please consult the instruction manual.

MAINTENANCE

Exposure to certain chemicals, such as bleach, can cause premature decomposition of the fabric. The best way to clean the sails is by spraying them gently with a garden hose or scrubbing lightly with water and mild soap. The sail must not be machine washed or dried.
