## TECHNICAL DATASHEET

### PRODUCT DATA

**Reference:** SUNNY VELA 3C BG

**Description:** Square Shade Sail

**Shape:** Square

**Dimensions:** 3x3 m

**Color:** Beige

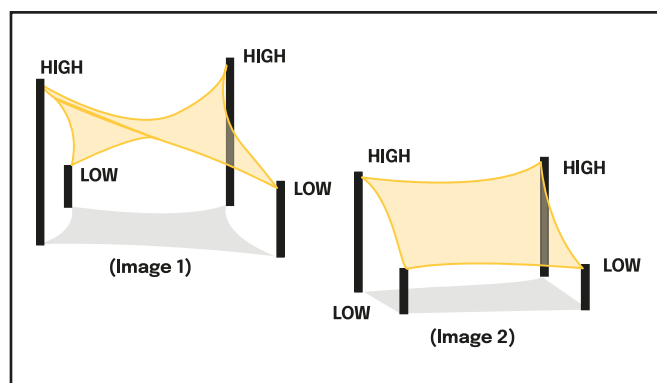

### TECHNICAL SPECIFICATIONS

|                 |                                              |
|-----------------|----------------------------------------------|
| MATERIAL        | Oxford Poliéster de 180 g/m <sup>2</sup>     |
| UV PROTECTION   | UV30 +                                       |
| WATERPROOFNESS  | High                                         |
| FIXINGS         | Stainless steel D-rings and fixing ropes     |
| ACCESSORIES     | Carry bag                                    |
| RECOMMENDED USE | Gardens, terraces, patios, and outdoor areas |

### ASSEMBLY OPTIONS

Installation with “HYPAR” effect (image 2) is recommended, although “Resort” effect (image 1) is also possible. In both cases, define the sail’s tilt to assist water drainage, as well as the tension to keep it firm while avoiding excessive strain.

It is important to select a location with solid anchor points (walls, posts, or trees) and leave at least an extra 10% of space between anchors relative to the sail’s measurement. For more information, please consult the instruction manual.

### MAINTENANCE

Exposure to certain chemicals, such as bleach, can cause premature decomposition of the fabric. The best way to clean the sails is by spraying them gently with a garden hose or scrubbing lightly with water and mild soap. The sail must not be machine washed or dried.
